cenvair Supercool, ergonomic design and maximum efficiency

cenvair has designed a compact and versatile model that generates 12,000 Btu of cooling in summer and 12,000 Btu of heating in winter.

So that depending on the cycle, summer or winter, you can control the room temperature simply by pressing a button: the compressor will cool or heat to obtain the desired "comfortable temperature".

Classified to the highest energy efficiency category "A".

Exclusively imported into the UK & Ireland by Scott Brothers Ltd, 1 Whiteside, Station Road, Holmes Chapel, Cheshire CW4 8AA
